

Profile

I am a video production enthusiast who has recently completed a three-year Film Production course at the University of Portsmouth, where I was awarded a First Class Honours degree. My primary focuses are social media content creation and video editing. However, I've had a brilliant three years furthering my knowledge about everything film. I've started to use the skills I've taught myself and the experience I've gained at university for freelance video editing, content production for companies as well as content production for my personal social media channels.
